

Project Initialization and Planning Phase

Date	01 October 2026
Team ID	6ab22737f32d8c9d8b225a8a
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

I am	I'm trying to	But	Because	Which makes me feel
Applicant seeking a loan	Secure a loan for property	Married with no co-applicant income	Self-employed with a good credit history	Optimistic about loan approval

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A male applicant seeking a loan.	Secure a loan for the property	Married with no co-applicant income.	Self-employed with a good credit history.	Optimistic about loan approval.

Project Problem Statements – Implement Client Script & UI Policy (Incident):

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A service desk agent logging an incident.	Create an incident quickly with complete and accurate details.	Mandatory fields such as Short description or Category are often left blank.	The form does not validate input or guide the user in real time.	Frustrated and slowed down.
PS-2	A support engineer resolving an incident.	Move the incident to Resolved or Closed with proper documentation.	Resolution notes and close code are skipped.	Nothing on the form makes them mandatory when the State changes.	Concerned about incomplete records.
PS-3	An end user reporting an issue.	Raise an incident with the correct	Wrong values are selected, or no warning appears.	No client script alerts the user or guides the	Confused and unsure about the request.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
		impact, urgency and priority.		selection.	
PS-4	An incident manager reviewing tickets.	View only the fields relevant to the incident being handled.	The form is cluttered with unnecessary fields.	No UI policy hides, shows or makes fields read-only based on conditions.	Overwhelmed and less productive.
