

Code-Layout, Readability and Reusability

Date: 01 October 2026

Team ID: 6ab22737f32d8c9d8b225a8a

Project Name: Implement Client Script & UI Policy (Incident)

Maximum Marks: 5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the Flow Designer project in terms of its structure, readability, and reusability. Well-organized flows with meaningful names, clear descriptions, proper comments, modular design, and reusable actions ensure that the project is maintainable and can be extended or reused in future development.

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium /
------	----------------------------	--------------------------	--------------	---------------------------------------

Code				Low)	Layout
------	--	--	--	------	--------

Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Flow Layout	Flow elements are arranged consistently and logically throughout the workflow.		
2	Proper Flow Structure	Flows, subflows, actions, and related components are logically organized.		
3	Meaningful Variable Names	Flow variables and data elements clearly reflect their purpose.		
4	Descriptive Action Names	Actions and flow steps are descriptively named for easy understanding.		
5	Flow Descriptions / Comments	Descriptions and comments explain the purpose and logic of flow steps.		
6	Modular Design	The workflow is divided into reusable flows, subflows, or actions where appropriate.		
7	No Redundant Logic	Duplicate, unnecessary, or unused flow logic is removed.		
8	Error Handling	Flow errors and exceptions are handled gracefully using appropriate paths and actions.		

Reusable Components / Modules:

1	Main Flow	Flow Designer	Primary business process	
2	Subflow	Flow Designer	Reusable process logic	
3	Flow Action	Flow Designer	Common automation task	
4	Decision / Condition Logic	Flow Designer	Different process branches	
5	Notification Action	Flow Designer	User or team notifications
